

CompSci - Call 1 Marie Skłodowska-Curie PhD Fellowships in Natural Sciences

16 positions

16 PhD scholarships in areas of astronomy, physics, chemistry, geoscience, bioscience, and mathematics and statistics are available in the CompSci program - a program co-funded by the Marie Skłodowska Curie Actions.

The program provides all students with an initial intensive course in computing and data science before starting on their research projects in a disciplinary research group. You will be part of a cohort of international students, learn digital and transferable skills, build an interdisciplinary network, and work with leading researchers.

You can learn more about the program, how to apply, employment conditions and about living and working in Oslo at the program website:
www.mn.uio.no/compsci/english/

CompSci combines a disciplinary doctoral program with training in computational and data science - providing the skills needed to digitally transform science, industry and society.

Application deadline:
March 1st

Starting date:
August/September 2021

Research topics:

Astronomy

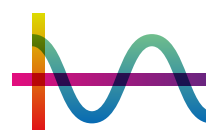

Bioscience

Chemistry

Geosciences

Mathematics
& Statistics

Physics
